SUMMARY

Software Engineer at HSBC building reactive Java microservices and enterprise APIs on a core credit platform. Shipped an ~80% latency reduction on a production API, authored a reusable Java-annotation validation framework, and automated network ops workflows saving 40% manual effort. B.E. CSE, CBIT (9.32 CGPA). IEEE-published. Azure DP-100 certified.

TECHNICAL SKILLS

- **Languages:** Python, Java, C, C++, JavaScript, Go, SQL
- **Backend & Frameworks:** Spring Boot, Reactive Java, Django, Flask, Node.js, REST APIs, Microservices
- **Frontend:** React.js, React Native, HTML, CSS
- **Databases:** MySQL, MongoDB, SQLite, Microsoft Dataverse, NoSQL
- **Cloud & DevOps:** AWS EC2, Docker, Kubernetes, Jenkins, Git/GitHub
- **Other:** JUnit, OData, Power Apps, GNS3, Cisco Packet Tracer, Android Studio

WORK EXPERIENCE

HSBC	Hyderabad, India
Software Engineer	Jan 2026 – Present
Trainee Software Engineer	Jul 2025 – Jan 2026
SDE Intern	Jan 2025 – Mar 2025

Stack: Java, Spring Boot, Reactive Java, JUnit, Jenkins, Microsoft Dataverse, OData, Power Apps

- **Cut payload generation latency by ~80% (100s → 20s)** on the Nova credit platform by refactoring reactive data flows and transformation logic, directly improving downstream service responsiveness.
- **Authored a custom Java-annotation validation framework** (reusable constraints + validators) enforcing input validation and consistent business rules across Dataverse-backed microservices and forms.
- **Integrated Microsoft Dataverse with reactive Java microservices via OData endpoints** and engineered reactive data-access pipelines to fetch, transform, and expose Dataverse table data with consistent mapping and error handling.
- **Drove API standardization** across the Nova central API repository, improving endpoint reuse and maintainability for credit-application creation services.
- **Delivered POC Power Apps screens, forms, and workflows** for an internal credit-risk rating platform, accelerating stakeholder feedback cycles and UI/UX validation.

Providence India	Hyderabad, India
SDE Intern	Jun 2024 – Aug 2024

Stack: Python, Django, SQLite, GNS3, Cisco Packet Tracer

- **Cut manual pre-check/post-check effort by 40%** by automating network-device output generation and comparison with a Python-based diffing tool.
- **Built a firewall-policy matcher + internal Django web app** adopted by the network operations team to streamline policy audits and management workflows.
- **Validated automation across simulated multi-device Cisco topologies** in GNS3 and Cisco Packet Tracer, ensuring correctness before production rollout.

PROJECTS & RESEARCH

Crop Disease Detection & Severity Estimation (IEEE Publication)	Flask · React Native · CNN · OpenCV
• Built an end-to-end multi-class CNN classifier for crop-leaf disease detection, served through a Flask REST API and consumed by a React Native mobile app for real-time inference. Added severity estimation via image processing (segmentation + pixel-ratio analysis) — published in IEEE .	

EDUCATION

Chaitanya Bharathi Institute of Technology (CBIT)	Hyderabad, India
B.E. Computer Science and Engineering — CGPA: 9.32 / 10.0	Nov 2021 – Jun 2025

CERTIFICATIONS & ACHIEVEMENTS

- **Microsoft Certified: Azure Data Scientist Associate (DP-100)** — Dec 2025 ([Credential](#))
- **Winner, HSBC Hackathon** — selected from 15,000+ participants for developing an innovative financial dashboard.
- **IEEE Published Author** — crop disease detection and severity estimation research.
- **Deputy Website Head, R&I Club, CBIT** — led development of the Robovanza annual technical-fest website.
- **State-Level Gold Medalist, Powerlifting** — discipline and consistency carried from sport into engineering.
